# MAY EXTEND THEIR

Territory

### BRANCHES ARE CONNECTED

Setting Even for Illinois Central Railroad's Nashville Line.

WILL ENTER A PRODUCTIVE FIELD

The Louisville Courier Journal of Dec. 2nd, 1906, contained

Altho local Louisville and Nashle representatives decline to have nything definite to say in regard their proposed lines and lines aleady in process of building in Westn Kentucky, it is evident after sevral of these small extensions are ade that connections will have been achieved which will give the L. & N. a line of about 250 Miles in ngth from Louisville in a southsesterly direction toward Paducah At Paducah another connection will e made with the Nashville, Chattaocga and St. Louis railroad, which is controlled by the Louisville and

While there is no northern outlet rom l'aducah at present save thru he Illinois Central lines, the strongst competitor of the L. & N. raiload, rumor says that the Big Four on will commence the building of extension of its line from Harrisrg. Ill., to Metropolis, on the Ohio which is nearly opposite Padu-This would give Northern mostition as an outlet for freight, the L. & N. wants now, and ald want more if the line from pisville thru the coal and mineral

So long as the Illinois Central confaed its operations and extensions to Vestern Kentucky, Tennessee and ssissippi, the Louisville and Nash railroad was not much concernbut when it invaded Nashville, e sacred and heretofore undisputed rritory of the L. & N., then a ort of revenge began to show itselfhis apparent spirit of revenue has en fired again by the Illinois Cenbuilding a line from Jackson, Birmingham, Ala., tapag the great iron fields on which L. & N. has almost had a mo-

The Illinois Central has been reap g a rich harvest from the coal fields which it runs in Western Kenand especially in Crittenden d Livingston counties, where it as had a monopoly on hauling all e output of the lead, zine, fluorpar and other fine ore beds that are being so extensively operated in Crittenden and Livingston counties, and which appears to be inexhaust-

The Louisville and Nashville peoare working quietly but steadily a number of small spurs or short es which when linked together will make a splendid line of road, tapping coal fields in Western The L. & N. 's St. Louis d Nashville line, which runs thru e State from Henderson to Guthrie, pping the Hopkins county coal dons, is one of its best paying Considerable coal is handled its line from Owensboro to Ruswhere it connects with the

disville and Memphis line. The Louisville & Nashville, hav operating connections with the its proposed western road extendalready from Louisville to Fords- as you can buy the other kind.

ville, Ohio county. The present branch from Irvington on the Main line of the Henderson Route to LINES TO MARION The of the Henderson Route to Fordsville through Hardinsburg is not what is known as a paying branch. The Louisville & Nashville is backing the building of the line 1. & N. Getting Into I. C.'s from Madisonville to Hartford, county seat of Ohio county. The work is progressing finely. By the buildfrom Hartford to Fordsville a line to Madisonville, touching the St. Louis and Nashville line. The ters one continuous coal bed.

> Already the Louisville & Nashville owns a short line from Madisonville to Providence in Webster county. It seat of Union county, which is rich both in coal and agriculture. It will invade the sacred territory of the Illinois Central. From Providence L. &. N. can build twenty-five miles or more road and enter Marion, the county seat of Crittenden county the industries of Kentucky. This again would give a direct line from Marion to Louisville, a distance about 200 miles. Twenty-five or thirty miles county seat of Livingston county, and then on to Paducah, the metropolis of Western Kentucky.

In this section such a line, besides opening up a vast territory rich in natural resources, would work a great detriment to the now exclusive tered the banquet hall the seene was business of the Illinois Central. Whether or not the Louisville and Nashville could secure Northern connection out Paducah, the road would tap its own Northern line at Madisonville. What makes the proposed line feasible is the fact that the L. & N. is preparing to double-track its ine from Henderson to Nashville Owing to the numerous and long sidings on this line the work will not be such a stupendous task.

Another probability is brought to light when the spur from Morganfield to Providence is finished by the Louisville & Nashville. From Mor ganfield fifteen miles west on the Ohio river is found Shawneetown, Ill., where the L. & N. now has a ine which starts from its main St. Louis line at McLeansbora, Ill. The line from Morganfield to Shawneeown would tap the greatest and richest corn-producing belt in the State, as well as rich coal beds. Such a road would be a great feeder, though a bridge would never span the Ohio at Shawneetown, which has ften been talked of.

#### A Miraculous Escape.

Mai. F. M. Clement, the well known citizen of the View vicinity, who is as straight as an arrow, notwithstanding the fact he is a grandfather, (although a youthful one) still delights in boyish pranks and gets into trouble. A few days ago the Major was "projecting" some way with a dynamite cartridge and hit it with a hammer thinking it was not loaded and would not explode. It did explode with a terriffic force, out hunting the day before. throwing particles in every direction. About ten pieces finding lodgment in the Major's physiognomy, and one piece struck between the ball of his eye and his nose, which shows what a narrow escape he made from losing one of his eyes. Dr. Cook was summoved and picked out all the pieces of the shell from his face and of the wounds bled profusely and were quite painful no complications. such as blood poisoning, which was feared, have arisen and the Major is almost well again and no doubt will enjoy Christmas as much as ever.

J. L. Rankin & Co, successor to nderson Route would have a line Rankin & Pickens have a nice clean everything will be elegant is a forestock of groceries, at as low a price

#### The Christmas Joy of the Lonely Heart.

While the earth abides there will always be lonely hearts whose loneliness is increased by the general good-fellowship of the season. Sorrow has a way of lifting the latch and coming, an unbidden guest, at some time or other, into every life. One day all is brightness, the next the world is dark. Among those Mrs. Ed Moore had the misfortune who are keeping Christmas this year there are some who have to rise above the personal grief in their determination not to cloud the sunshine of others. How may they best succeed? By the old-fashioned way that leads heroic feet over rough roads and shows that every turn & ship. The shrine is not visible to all travelers; from some it is hidden, but those who stop there to pray behold within it a cross, and they wreathe the cross with flowers. They are lonely themselves, to drop the metaphor, but they do not inflict their sadness on their friends. They invite children to visit them, they carry comfort and cheer to the aged

#### ARTIFICIAL WARMTH.

an Inberited Habit and s Sign of Luxury.

the big, restless, energetic vorld outside of this tropical beit, how ever, the matter of keeping warm is ever present, troublesome and engensive, throughout half of each passing year.

As a matter of fact, the world of humanity dwelling in stoveland never has been in all the ages really and com fortably warm in winter. It is largely our own fault. Mankind is the only animal which employs fire in the effort to survive the cold of the winters. The hardy lower animals do not need it. however much their luxuriously enervated representatives, the dog and the cat, may enjoy it when they have a chance.

Ancient man only got himself rid of his provident coat of hair and his sufficent latent heat when he began to loaf around the family cooking stove and absorb the intoxicating comfort of artificial warmth. This faraway ancestor is responsible for the fact that the present day human being, outside of the belt aforesaid, is obliged to keep close to a thermometer registering hearly or quite 70 degrees F. from October to May, besides which he must needs wear extra clothing. This also is an inherited habit.

A traveler west once asked a half naked Indian in midwinter how he managed to stand the weather. The Indian replied: "Your face no got a coat. It no cold. Indian face all over." -- National Magazine.

#### VIRTUE IN COPPER.

The Metal Is a Death Dealer to All

Disease Germs. "Copper is a marvelous preventive of disease. If we returned to the old copper drinking vessels of our fore athers, typhoid epidemic would disap-

The speaker, a filtration expert, took

a copper cent from his pocket. "Examine this cent under the microscope," he said, "and you will find it altogether free from disease germs. Examine gold and silver coins, and you will find them one wriggling and contorting germ mass. Yet copper coins pass through dirtier hands than gold and silver ones. You'd think they ought to be alive with micro-organisms. But no. Copper kills germs. Diphtheria and cholera cultures smeared on a copper cent die in less than two hours.

"They have many cholera epidemics in China, but certain towns are always immune. These towns keep their drinking water in great copper vessels. Travelers have tried to buy these vessels, for they are beautiful, but the villagers will not sell them. They have a superstition that their bealth and welfare depend on their retention. I wish all superstitions were as true and salutary as that." - Philadelphia Bul-

The Joke Was on the Students. when Dr. Nathan Lord was presi dent of Dartmouth college be used to drive about in a dilapidated, old fashoned contrivance. The students be came tired of seeing the concern and. though Dr. Lord knew of this, he clung to the old calash. One night a group of the young men bauled the thing out of Henry Dunn's family have moved the shed where it was kept, took it several miles down the road toward Lebanon and hid it in a spot where it was concealed by dense foliage. They were just about to depart, well satisfied with the tiresome job, when the curtain which completely enveloped the front of the calash was suddenly pushed aside and the well known face of President Lord appeared. "Now, gentlemen," he said, "you may draw me back

#### Homes Under the Ground.

In the salt district in Cheshire, England, the brine has been pumped so continuously out of the earth that the land has settled very considerably. The houses naturally sink with the earth, and in some of the streets in Northwich only the roofs are visible. The houses are inhabited, although the rooms are underground. In a great many cases additional stories have been added, so that by living in the upper rooms the residents may have some light and air. The roadways sink, too, but are kept up to the

"Don't waste your time in elipping off the branches," said the woodman to his son, "but lay your ax at the root of the tree." And the young man went out and laid his ax at the foot of the tree, like a good and dutiful boy, and then he went fishing. Truly there is nothing so beautiful as filial obedience.

One View of It. "But if she makes all her own dresses should think she'd be a good wife for you. It shows she's industrious

and sensible." "Not for me, thank you. It simply shows how poor her father must be." Philadelphia Ledger.

carr from the village. We entered the general assemblyoom. It was roomy and quaint, and somewhere above us was the inevitable room in which George Washingon had slept. The great booded fire-Casually I observed that we were not alone. Over yonder, in a shadowed other, sat two men, very well bun dled up, and, to all appearances, fast Morlarty lighted a fourbranched candelabrum and showed us

com, took our orders, and left us. This is romance," said I "They sed to do these things hundreds of rears ago, and everybody had a good

the way to the little private dining-

It is now all very wicked and improper," murmured the girl, laying other in immaculate evening dress. aside her domino for the first time; The latter doffed his opera hat with but delightful! I now find I haven't the most engaging smile imaginable. the least bit of remorse for what I have done

In that dark evening gown she was very beautiful. Her arms and shoulders were tinted like Carrara marble; and I knew instantly that I was never going to recover. I drew two chairs close to the grate I gat down in one and she in the other. With a contented sigh she rested her blue-slippered feet on the brass fender. My one regret is that I haven't

any shoes. What an adventure! Two hours in the society of this enchanting creature! It was almost too good to be true. Ah, We never expected to see these if it might always be like this-to return home from the day's work, to be William? greeted warmly by a woman as beautiful as this one! I sighed loudly.

Moriarty came with the chicken and ham and coffee.

If ye would like, it won't be a bit of trouble to show ye George Washington's room; or"-with inimitable rish drollery-"I can tell ye that he dined in this very room.

That will serve," smiled the firl; and Moriarty bowed himself out. lis departure was followed by the latter of silver upon porcelain. Of a truth, both of us were hungry. was simply ravenous," the girl

onfessed. And as for me, I never dreamt could be so unromantic. Now." said I pushing aside my plate, and dropping sugar into my coffee, and vainly hunting in my pockets for a cigar, here remains only one mystery to

cleared up." and what might this mystery be?"
she asked. "The whereabouts of the bogus Haggerty

The girl sat pale and rigid in her What do you want?" I demanded savagely.

William assented.

"For one thing, I should like to nan's sitting down to dine with a lady without having washed his face. The

The Master Rogue & Ighted a Cigarette.

Yes; there is yet another mystery solve: myself." I knew it. Withcoal-dust does not add to your manly beauty. You haven't a cake of soap 'No sir." William's face expressed

Shall you ever be able to solve indescribable enjoyment of the scene The girl's mouth stiffened. She was struggling to repress the almost irresistible smile that tickled her lips. "In times like these," said I, deter

mined not to be outdone, "we are I wonder if the ten of hearts is friends. But one does not talk of love personal appearances. I apologize to on eight hours' acquaintance. Besides, "Fine, fine! I sincerely admire you,

"He certainly has, sir."

Perhaps I want to bring about an you know of me? Nothing. What do invitation, and has a merry time of I know of you? Nothing, save that it indeed. To have the perfect sense of humor-that is what makes the ways likely to lead us into trouble. World go round."

### GOVERNMENT WAGES LOW.

H. T. Newcomb Gives Facts of Interest to Wage Earners.

From 1896 to 1904 the average retail rost of the ordinary articles of food used in the United States advanced no less than 17 per cent (16.96, to be more exact)-that is, the purchaser of food for a family had to pay \$1.17 in 1904 for the same quantity and quality of food that \$1 would purchase in 1896. These are official statistics compiled by the highly skilled experts employed by the federal government, and every housewife knows that they do not overstate the advance. Other necessities of life have advanced in cost with approximately equal rapidity.

Unquestionably wages ought, generally speaking, to have advanced somewhat in proportion to the increase in the cost of living. In private employ Office with Blue & Nunn in Postoffice ment this has apparently taken place, the average wages per bour reported by the federal bureau of labor being 17.36 per cent higher in 1904 than in 1896 and the average weekly earnings 12.76 per cent higher. The advances thus represented are spread all over the country; they characterize every private industrial enterprise and have benefited all classes of workmen employed in private undertakings.

How is it with public employment? A few undertakings conducted under public ownership employ labor like that similarly serving private employers in the same communities, and in these cases the public rate of wages has slowly been advanced somewhat in proportion to the advance in the wages privately paid. But where any American government, municipal, state or national, is the sole or by far the argest employer of a particular class of labor the advances to meet increased cost of living have been so few that the ordinary investigator will be un-

The largest printing office in the world is that maintained at Washingon by the government, and there the federal government employs a large Cancer Sanitarium, Harrisburg, III. force of Intelligent and highly skilled wine. workingmen. A change in the bases of payment in 1899 from the piece ork to the per hour system prevents omparisons with dates prior to the hange, but wages have remained stabe official statisticians report that the cost of food has advanced since the mte of wages was fixed by statute fully 12:25 per cent. During the same Office Suite 3 and 4 Press Building Fears the wages of printers in private book publishing or job printing establishments advanced throughout the male, 14.67 per cent; compositors, female, 20.30 per cent; press feeders, male, 22.41 per cent; press feeders, .emale, 21.27 per cent; pressmen, 11.75

#### DO YOU OWN A HORSE?

per cent.-H. T. Newcomb.

In Some Respects.

The subject of depreciation is well worthy of the careful consideration of MARION, KY. hose who are proue to ignore that tem in estimating the cost of lights nore people own horses than lighting plants it may be belpful to consider lepreciation as applied to horses.

You pay \$250 for a five-year-old torse. That's original cost. If you borlow the money you must pay interest m it. If you don't borrow it you lose he interest you would get if you didn't ony the horse. Either way it's interest You feed the borse, and perhaps hire a nan to take care of him. That's opertting expenses. You get him shod ocasionally and call in the veterinarian when he is sick. That's renewals and epairs. After a few years, in spite of be best of care, the horse is no longer mapable of doing the required work compared with the original cost. That's lepreciation. If you haven't laid that by year by year out of the horse's ony a new horse, and you may not If you have property in the town of ind it easy to do so if you haven't resappens to municipal plants that don't provide an adequate depreciation fund.

Making Peter Pay For Paul,

Whether a public utility be adminstered by the government itself or by private corporation, we hold that every person who uses it should be held to pay the cost of the service which ie receives and that no man should be compelled by taxation or otherwise to bear any part of his neighbor's expenses for light and power, for telephone service or for transportation of nimself or of his goods.

Every proposal that a municipality assume operation of all public utilities and reduce rates to persons using them, regardless of what the service nay actually cost, is an attempt to orce some men to bear the expenses of others, because where the outlay for operation exceeds earnings the deficit must be made up by taxation, and this we denounce as socialistic and therefore hostile to justice and subversive of democratic government. - Bourke

Senator Sorghum In Doubt. "Do you think that municipal own-

aship would eliminate graft? "I am not quite sure." answered Senttor Sorghum, "whether it would elimitate it or simply originate a new kind." -Washington Star.

assume a matter-of-fact course granting of a preliminary injunction to be the ordinary and proper judicial disposition of such cases; and there have undoubtedly been flagrant wrongs committed by judges in connection with labor disputes even within the last few years, althe I think much less often than in former years. Such judges by their unwise action immensely strengthen the hands of those who are striving entirely to do away with the power of injunction; and therefore such careless use of the injunctive process tends to threaten its very existence, for if the American people ever become convinced that this process is habitually abused, whether in matters affecting labor or in matters affecting corporations, it will be well-nigh impossible to prevent its abolition.

Criticism of the Judiciary.

It may be the highest duty of a judge at any given moment to disregard, not merely the wishes of individuals of great political or financial power, but the overwhelming tide of public sentiment, and the judge who does thus disregard public sentiment when it is wrong, who brushes aside the plea of any special interest when the pleading is not founded on righteousness, performs the highest service to the country. Such a judge is deserving of all honor; and all honor cannot be paid to this wise and fearless judge if we permit the growth of an absurd convention which would forbid any criticism of the judge of another type, who shows himself timid in the presence of arrogant disorder, or who on insufficient grounds grants an injunction that does grave injustice, or who on insufficient grounds grants an injunction that does grave injustice, or who in his capacity as a construer, and therefore in part a maker of the law, in flagrant fashion thwarts the cause of decent government. The judge has a power over which no review can be exercised; he himself sits in review upon the acts of both the executive and legislative branches of the government; save in the most extraordinary cases he is amenable only at the bar of public opinion; and it is unwise to maintain that public opinion in reference to a man with such power shall neither be exprest nor led. nor led. The best judges have ever been fore-

Criticism of the Judiciary.

The best judges have ever been fore-most to disclaim any immunity from criticism. This has been true since the days of the great English Lord Chancel-lor Parker, who said: "Let all people be at liberty to know what I found my judgment upon, that, so when I have given it in any cause, others may be at liberty to judge of me." The proprieties of the case were said.

be at liberty to know what I found my judgment upon; that, so when I have given it in any cause, others may be at liberty to judge of me." The proprieties of the case were set forth with singular clearness and good temper by Judge W. H. Taft, when a United States circuit judge, Il years ago, in 1895.

"The opportunity freely and publicly to criticize judicial action is of vastly more importance to the body politic than the immunity of courts and judges from unjust aspersions and attack. Nothing tends more to render judges careful in their decisions and anxiously solicitous to do exact justice than the consciousness that every act of theirs is to be subjected to the intelligent scrutiny and candid criticism of their fellow-men. Such criticism is beneficial in proportion as it is fair, dispassionate, discriminating and based on a knowledge of sound legal principles. The comments made by learned text writers and by the acute editors of the various law reviews upon judicial decisions are therefore highly useful. Such critics constitute more or less impartial tribunals of professional opinion before which each judgment is made to stand or fall on its merits, and thus exert a strong influence to secure uniformity of decision. But non-professional opinion before which each judgment is made to stand or fall on its merits, and thus exert a strong influence to secure uniformity of decision. But non-professional opinion before which each judgment is made to stand or fall on its merits, and thus exert a strong influence to secure uniformity of decision. But non-professional opinion before which each judgment is made to stand or fall on its merits, and thus exert a strong influence to secure uniformity of decision. But non-professional opinion before which each judgment is made to fall on its merits, and thus exert a strong influence to secure and to reach the result which approves itself to his inmost heart, such comment serves a useful purpose. The two important elements of moral character in a judge are an earnest desire

that basis—that is, if this discrimination in favor of this particular shipper was made with an 18 instead of a 23 cent rate and the tariff rate was maintained as against their competitors—the result might be and not improbably would be that their competitors would be driven out of business. This crime is one which in its nature is deliberate and premeditated. I think over a fortnight elapsed between the date of Paimer's letter requesting the reduced rate and the answer of the railroad company deciding to grant it, and then for months afterwards this business was carried on and these claims for rebates submitted month after month and checks in payment of them drawn month after month. Such a violation of the law, in my opinion, in its essential nature, is a very much more heinous act than the ordinary common, vulgar crimes which come before criminal courts constantly for punishment and which arise from sudden passion or temptation. This crime in this case was committed by men of education and of large business experience, whose business standing in the community was such that they might have been expected to set an example of obedience to law, upon the maintenance of which alone in this country the security of their property depends. It was committed on behalf of a great railroad corporation, which jike other railroad corporation, which is charged with the highest obligation in the transaction of its business for the public's convenience and its own, which performs quasipublic functions and which is charged with the highest obligation in the transaction of its business for the public's convenience and its own, which performs quasipublic functions and which is charged with the highest obligation in the transaction of its business of react the citizens of this country alike, and not to carry on its business of citizens. This crime in its sature is one usually done with secrecy, and proof of which it is very difficult to obtain. The interface commensurate with the grantly of the courted to the conclusion, in a case "On the other hand, the danger of de-stroying the proper influence of judicial decisions by creating unfounded preju-dices against the courts justifies and redices against the courts justifies and requires that unjust attacks shall be met and answered. Courts must ultimately rest their defense upon the inherent strength of the opinions they deliver as the ground for their conclusions and must trust to the calm and deliberate judgment of all the people as their best vindication."

Sound Judgment of the People.

the principal penalty should be imposed on the corporation. The traffic manager in this case, presumably, acted without any advantage to himself and without any interest in the transaction, either by the direct authority or in accordance with what he understood to be the policy or the wishes of his employer.

"The sentence of this court in this case is, that the defendant Pomeroy, for each of the six offenses upon which he has been convicted, be fined the sum of \$1,000, making six fines, amounting in all to the sum of \$6,000; and the defendant, The New York Central & Hudson River Railroad company, for each of the six crimes of which it has been convicted, be fined the sum of \$18,000, making six fines amounting in the aggregate to the sum of \$108,000, and judgment to that effect will be entered in this case." There is one consideration which should There is one consideration which should be taken into account by the good people who carry a sound proposition to an excess in objecting to any criticism of a judge's decision. The instinct of the American people as a whole is sound in this matter. They will not subscribe to the doctrine that any public servant is to be above criticism. If the best citithis matter. They will not subscribe to the doctrine that any public servant is to be above criticism. If the best citizens, those most competent to express their judgment in such matters, and above all those belonging to the great and honorable profession of the bar, so profoundly influential in American life, take the position that there shall be no criticism of a judge under any circumstances, their view will not be accepted by the American people as a whole. In such event the people will turn to, and tend to accept as justifiable, the intemperate and improper criticism uttered by unworthy agitators. Surely, it is a misfortune to leave to such critics a function, right in itself, which they are certain to abuse. Just and temperate criticism, when necessary, is a safeguard against the acceptance by the people as a whole of that intemperate antagonism towards the judiciary which must be combated by every right-thinking man, and which, if it become widespread among the people at large, would constitute dire menace to the republic. Evasion by Technicalities.

In connection with this matter, I would like to call attention to the very unsatisfactory state of our criminal law, resulting in large part from the hab't of setting aside the judgments of inferior courts on technicalities absolutely unconnected with the merits of the case, and where there is no attempt to show that there has been any failure of substantial justice. It would be well to enact a law providing something to the effect that:

No judgment shall be set aside or new

#### THE NEGRO PROBLEM. President Says Mob Law Is a Menace

In my last message I suggested the enactment of a law in connection with the issuance of injunctions, attention matter by the suggested the enactment of a law in connection with the last support of the right of applying the provided whether a law shoulshing allore there is the use of injunctions in such cases sould be ineffective. Moreover, I bear the courts in which case of course the legislation would be ineffective. Moreover, I bear the courts in which case of course the legislation would be ineffective. Moreover, I bear the courts to deal with them in the most summary and effective way possible. But as far subjective way possible. But as far subjective way possible. But as far subjective way possible but as far subjective way possible. But as far subject to the possibility of grave abuse. It is a power that should be exercised, with extreme care accuting of all men, ject to the jealus accuting of a proposition of the judicion and the provided when In my last message I suggested the ento the Country.

triot in America needs to lift up his voice in loud and eternic protest against the mob spirit that is threatening the integrity of this republic."
Gov. Jelks, of Alabama, has recently spoken as follows: "The lynching of any person for whatever crime is inexcusable anywhere—it is a defiance of orderly government; but the killing of innocent people under any provocation is infinitely more horrible; and yet innocent people are likely to die when a mob's terrible lust is once aroused. The lesson is this: No good citizen can afford to countenance a defiance of the statutes, no matter what the provocation. The innocent frequently suffer, and, it is my observation, more usually suffer than the guilty. The white people of the south indict the whole colored race on the ground that even the better elements lend no assistance whatever in ferreting out criminals of their own color. The respectable colored people must learn not to harbor their criminals, but to assist the officers in bringing them to justice. This is the larger crime, and it provokes such atroclous offenses as the one at Atlanta. The two races can never get on until there is an understanding on the part of both to make common cause with the law-abiding criminals of any color."

Danger of Lace Hatred.

Moreover, where any crime commit-ted by a member of one race against a member of another race is avenged in such fashion that it seems as if not in such fashion that it seems as if not the individual criminal, but the whole race, is attacked, the result is to exasperate to the highest degree race feeling. There is but one safe rule in dealing with black men as with white men: it is the same rule that must be applied in dealing with rich men and poor men; that is, to treat each man, whatever his color, his creed, or his social position, with even-handed justice on his real worth as a man. White people owe it quite as much to themselves as to the colored race to treat well the colored man who shows by his life that he deserves such treatment; for it is surely the highest wisdom to encourage in the colored race all those individuals who are honest, industrious. law-abiding, and who therefore make good and safe neighbors and citizens. Reward or punish the individual on his merits as an individual. Evil will surely come in the end to both races if we substitute for this just rule the habit of treating all the members of the race, good and bad, alike. There is no question of "social equality" or "negro domination" involved: only the question of relentlessly punishing bad men, and of securing to the good man the right to his life, his liberty, and the pursuit of his happiness as his own qualities of heart, head and hand enable him to achieve it. the individual criminal, but the whole

of heart, head and hand enable him to achieve it.

Every colored man should realize that the worst enemy of his race is the negro criminal, and above all the negro criminal who commits the dreadful crime of rape; and it should be felt as in the highest degree an offense against the whole country, and against the colored race in particular, for a colored man to fail to help the officers of the law in hunting down with all possible earnestness and zeal every such infamous offender. Moreover, in my judgment, the crime of rape should always be punished with death, as is the case with murder; assault with intent to commit rape should be made a capital crime, at least in the discretion of the court; and provision should be made by which the punishment may follow immediately upon the heels of the offense; while the trial should be so conducted that the victim need not be wantonly shamed while giving testimony, and that the least possible publicity shall be given to the details. The members of the white race on the other hand should understand that every lynching represents by just so much a loosening of the bands of civilization; that the spirit of lynching inevitably throws into prominence in the community all the foul and evil creatures who dwell therein. No man can take part in the torture of a human being without having his own moral nature permanently lowered. Every lynching means just so much moral deterioration in all the children who have any knowledge of it, and therefore just so much additional trouble for the next generation of Americans.

Let justice be both sure and swift; Americans.

Let justice be both sure and swift; but let it be justice under the law, and not the wild and crooked savagery of a mob.

There is another matter which has a direct bearing upon this matter of lynching and of the brutal crime which sometimes calls it forth and at other times merely furnishes the excuse for its existence. It is out of the question for our people as a whole permanently to rise by treading down any of their own number. Even those who themselves for the moment profit by such maltreatment of their fellows will in the long run also suffer. No more shortsighted policy can be imagined than, in the fancied interest of one class, to prevent the education of another class. The free public school, the chance for each boy or girl to get a chance for each boy or girl to get a good elementary education, lies at the foundation of our whole political situ-ation. In every community the poorfoundation of our whole political situation. In every community the poorest citizens, those who need the schools most, would be deprived of them if they only received school facilities proportionately to the taxes they paid. This is as true of one portion of our country as of another. It is as true for the negro as for the white man. The white man, if he is wise, will decline to allow the negroes in a mass to grow to manhood and womanhood without education. Unquestionably education such as is obtained in our public schools does not do everything tolic schools does not do everything wards making a man a good citizen; but it does much. The lowest and most brutal criminals, those for instance who commit the crime of rape, are in the great majority men who have had either no education or very litle; just as they are almost invariably men who as they are almost invariably men who own no property; for the man who puts money by out of his earnings, like the man who acquires education. is usually lifted above mere brutal criminality. Of course the best type of education for the colored man, taken as a whole, is such education as is conferred in schools like Hampton and Takkenger, where the barrent is conferred in schools like Hampton and Tuskegee; where the boys and girls, the young men and young women, are trained industrially as well as in the ordinary public school branches. The graduates of these schools turn out well in the great majority of cases, and hardly any of them become criminals, while what little criminality there is never takes the form of that brutal violence which invites lynch law. Every graduate of these schools—and for the matter of these schools—and for the matter of that every oher colored man or woman—who leads a life so useful and honorable as to win the good will and respect of those whites whose neighbor he or she is, thereby helps the whole colored race as it can be helped in no other way; for next to the negro himself, the man who can do most to help the negro is his white neighbor who lives near him; and our steady effort should be to better the relations between the two. Great tho the benefit of these schools has been to their colored pupils and to the colored people, it may well be questioned whether the benefit has not been at least as great to the white people among whom these colored pupils live after they graduate.

Exciting Mos Vengeance. Tuskegee; where the boys

Exciting Mob Vengeance.

Be it remembered, further, that the individuals who, whether from folly, from evil temper, from greed for office, or in a spirit of mere base demagogy, indulge in the inflammatory and incenindulge in the inflammatory and incendiary speeches and writings which tend to arouse mobs and to bring about lynching, not only thus excite the mob, but also tend by what criminologists call "suggestion," reatly to increase the likelihood of a repetition of the very crime against which they are invelghing. When the mob is composed of the people of one race and the man lynched is of another race, the men who in their speeches and writings either excite or justify the action tend, of course, to excite a bitter race feeling and to cause the people of the opposite race to lose sight of the abominable act of the criminal himself; and in addition, by the prominence they of the people of one race and the man lynched is of another race, the men who in their speeches and writings either excite or justify the action tend, of course, to excite a bitter race feeling and to cause the people of the opposite race to lose sight of the abominable act of the criminal himself; and in addition, by the prominence they undoubtedly tend to excite in other brutat and deprayed between thoughts of committing it. Swift, relentless and orderly punishment under the law in the enly way by which criminality of

this type can permanently he sup-

The Preaching of Class Distinction Is Severely Condemned.

Severely Condemned.

In dealing with both labor and capital, with the questions affecting both corporations and trade unions, there is one matter more important to remember than aught else, and that is the infinite harm done by preachers of mere discontent. These are the men who seek to excite a violent class hatred against all men of wealth. They seek to turn wise and proper movements for the better control of corporations and for doing away with the abuses connected with wealth, into a campaign of hysterical excitement and falsehood in which the aim is to inflame to madness the brutal passions of mankind. The sinister demagogs and foolish visionaries who are always eager to undertake such a campaign of destruction sometimes seek to associate themselves with those working for a genuine reform in governmental and social methods, and sometimes masa genuine reform in governmental and social methods, and sometimes mas-querade as such reformers. In reality they are the worst enemies of the cause they profess to advocate, just as they are the worst enemies of the cause they profess to advocate, just as the purveyors of sensational slander in newspaper and magazine are the worst enemies of all men who are engaged in an honest effort to better what is bad in our social and governmental conditions. To preach hatred of the rich man as such, to carry on a campaign of slander and invective against him, to seek to mislead and inflame to madness honest men whose lives are hard and who have not the kind of mental training which will permit them to appreciate the danger in the doctrines preached—all this is to commit a crime against the body politic and to be false to every worthy principle and tradition of American national life. Moreover, while such preaching and such agitation may give a livelihood and a certain notoriety to some of those who take part in it, and may result in temporary political success of others, in the long run every such movement will either fail or else will provoke a violent reaction, which will itself result not merely in undoing may result in temporary political success of others, in the long run every such movement will either fail or else will provoke a violent reaction, which will itself result not merely in undoing the mischief wrought by the demagog and the agitator, but also in undoing the good that the honest reformer, the true upholder of popular rights, has painfully and laboriously achieved. Corruption is never so rife as in communities where the demagog and the agitator bear full sway, because in such communities all moral bands become loosened, and hysteria and sensationalism replace the spirit of sound judgment and fair dealing as between man and man. In sheer revolt against the squalid anarchy thus produced men are sure in the end to turn toward any leader who can restore order, and then their relief at being free from the intolerable burdens of class hatred, violence and demagogy is such that they cannot for some time be aroused to indignation against misdeeds by men of wealth; so that they permit a new growth of the very abuses which were in part responsible for the original outbreak. The one hope for success for our people lies in a resolute and fearless, but sane and cool-headed advance along the path marked out last year by this very congress. There must be a stern refusal to be misled into following either that base creature who appeals and panders to the lowest instincts and passions in order to arouse one set of Americans against their fellows, or that other creature, equally base but no baser, who in a spirit of greed, or to accumulate or add to an aiready huge fortune, seeks to exploit his fellow Americans with callous disregard to their welfare of soul and body. The man who debauches others in order to obtain a high office stands on an evil equality of corruption with the man who debauches others for financial profit; and when hatred is sown the crop which springs up can only be evil.

Duty of the People.

Duty of the People.

Duty of the People.

The plain people who think—the mechanics, farmers, merchants, workers with head or hand, the men to whom American traditions are dear, who love their country and try to act decently by their neighbors, owe it to themselves to remember that the most damaging blow that can be given popular government is to elect an unworthy and sinister agitator on a platform of violence and hypocrisy. Whenever such an issue is raised in this country nothing can be gained by flinching from it, for in such case democracy is itself on trial, popular self-government under republican forms is itself on trial. The triumph of the mob is just as evil a thing as the triumph of the plutocracy, and to have escaped one danger avails nothing whatever if we sucuumb to the other. In the end the honest man, whether rich or poor, who earns his own living and tries to deal justly by his fellows, has In the end the honest man, whether rich or poor, who earns his own living and tries to deal justly by his fellows, has as much to fear from the insincere and unworthy demagor, promising much and performing nothing, or else performing nothing but evil, who would set on the mob to plunder the rich, as from the crafty corruptionist, who, for his own ends, would permit the common people to be exploited by the very wealthy. If we ever let this government fall into the hands of men of either of these two classes, we shall show ourselves false to America's past. Moreover, the demagog and corruptionist often work hand in hand. There are at this moment wealthy reactiontionist often work hand in hand. There are at this moment wealthy reactionaries of such obtuse morality that they regard the public servant who prosecutes them when they violate the law, or who seeks to make them bear their proper share of the public burdens, as being even more objectionable than the violent agitator who hounds on the mob to plunder the rich. There is nothing to choose between such a rethe mob to plunder the rich. There is nothing to choose between such a reactionary and such an agitator; fundamentally they are alike in their selfish disregard of the rights of others; and it is natural that they should join in opposition to any movement of which the aim is fearlessly to do exact and over instice to all ven justice to all.

Railroad Employees' Hours. I call your attention to the need of passing the bill limiting the number of hours of employment of railroad employees. The measure is a very moderate one and I are consequent. I call your attention to the need of passing the bill limiting the number of hours of employment of railroad employees. The measure is a very moderate one and I can conceive of no serious objection to it. Indeed, so far as it is in our power, it should be our aim steadily to reduce the number of hours of labor, with as a goal the general introduction of an eight-hour day. There are industries in which it is not possible that the hours of labor should be reduced; just as there are communities not far enough advanced for such a movement to be for their good, or, if in the tropics, so situated that here is no analogy between their needs and ours in this matter. On the isthmus of Panama, for instance, the conditions are in every way so different from what they are here that an eight-hour day would be absurd; just as it is absurd, so far as the isthmus is concerned, where white labor cannot be employed, to bother as to whether the necessary work is done by alien black men or by alien yellow men. But the wageworkers of the United States are of so high a grade that alike from the merely industrial standpoint and from the civic standpoint is should be our object to downat we can in the direction of securing the general observance of an eighthour day. Until recently the eighthour day in the bureau of labof, it is being rigidly enforced, and I shall speedily be abie to say whether or not there is need of further legislation in reference thereto; for our purpose is to see it obeyed in spirit no less than in letter. Half holidays during summer should be established for government employees; it is as desirable for wageworkers who toil with their hands as for salaried officials whose labor is mental that there should be a reasonable amount of holiday.

Labor of Women and Children.

Labor of Women and Children.

come in the crory of those which affect in the transcring way the home life of the nation. The hore rors incident to the employment of young children in factories or at work anywhere are a blot on our civilization. It is true that each state must ultimately settle the question in its own way; but a there official investigation of the matter, with the results published broadcast, would greatly help toward arousing the public conpublished broadcast, would greatly help toward arousing the public conscience and securing unity of state action in the matter. There is, however, one law on the subject which should be enacted immediately, because there is no need for an investigation in reference thereto, and the failure to enact it is discreditable to the national government. A drastic and thorogoing child-labor law should be enacted for the District of Columbia and the territories.

Employers' Liability.

Among the excellent laws which the congress past at the last session was a employers' liability law. It was a marked step in advance to get the recognition of employers' liability on the statute books; but the law did not go far enough. In spite of all precautions exercised by employers there are unavoidable accidents and even deaths involved in nearly every line of business connected with the mechanic arts. This inevitable sacrifice of life may be reduced to a minimum, but it cannot be completely eliminated. It is a great social injustice to compel the employee, or rather the family of the killed or disabled victim, to bear the entire burden of an inevitable sacrifice. In other words, society shirks is duty by laying the whole cost on the victim, whereas the injury comes from what may be called the legitimate risks of trade. Compensation for accidents or deaths due in any line of industry to the actual conditions under which that industry is carried on, should be paid by that portion of the community for the benefit of which the industry is carried on, should be paid by that portion of the community for the benefit of which the industry is carried on, should be paid by that portion of the community for the benefit of which the industry is carried on, should be paid by that portion of the community for the benefit of which the industry is carried on, should be paid by that portion of the community for the benefit of which the industry is carried on. Among the excellent laws which the dustry. If the entire trade risk is placed upon the employer he will promptly and properly add it to the legitimate cost of production and assess it proportionately upon the consumers of his commodity. It is therefore clear to my mind that the law should place this, entire "risk of a trade" upon the employer. Neither the federal law, nor, as far as I am informed, the state laws dealing with the question of employers' liability are sufficiently thorogoing. The federal law should of course include employees in navy-yards, arsenals, and the like.

Investigation of Disputes.

Investigation of Disputes.

The commission appointed by the president October 16, 1902, at the request of both the anthracite coal operators and miners to inquire into, consider, and passupon the question in controversy in connection with the strike in the anthracite regions of Pennsylvania and the cause out of which the controversy arose, in their report, findings, and award expresit the belief "that the state and federal governments should provide the machinery for what may be called the compulsory investigation of controversies between employers and employees when they arise." This expression of belief is deserving of the favorable consideration of the congress and the enactment of its provisions into law. A bill has already been introduced to this end.

Records show that during the syears from January 1, 1881, to December 31, 1900, there were strikes affecting 117-509 establishments, and 6,105,694 employees were thrown out of employment. During the same period there were 1,005-000 people out of employment. These strikes and lockouts involved an estimated loss to employees of \$137,000,000 and to employers of \$145,000,000. The public suffered directly and indirectly probably as great additional loss. But the money loss, great as it was, did not measure the anguish and suffering endured by the wives and children of employees whose pay stopt when their work stopt, or the disastrous effect of ployees whose pay stopt when their work stopt, or the disastrous effect of the strike or lockout upon the business of employers, or the increase in the cost of products and the inconvenience and

of products and the inconvenience and loss to the public.

Many of these strikes and lockouts would not have occurred had the parties to the dispute been required to appear before an unprejudiced body representing the nation and, face to face, state the reasons for their contention. In most instances the dispute would doubtless befound to be due to a misunderstanding instances the dispute would doubtless be found to be due to a misunderstanding by each of the other's rights, aggravated by an unwillingness of either party to accept as true the statements of the other as to the justice or injustice of the matters in dispute. The exercise of a judicial spirit by a disinterested body representing the federal government, such as would be provided by a commission on conciliation and arbitration sion on conciliation and arbitration would tend to create an atmosphere of would tend to create an atmosphere of friendliness and conciliation between contending parties; and the giving each side an equal opportunity to present fully its case in the presence of the other would prevent many disputes from developing into serious strikes or lockouts, and is other cases, would enable the commission to persuade the opposing parties to come to terms.

other cases, would enable the commission to persuade the opposing parties to come to terms.

In this age of great corporate and labor combinations, neither employers nor employees should be left completely at the mercy of the stronger party to a dispute, regardless of the righteousness of their respective claims. The proposed measure would be in the line of securing recognition of the fact that in many strikes the public has itself an interest which cannot wisely be disregarded; an interest not merely of general convenience, for the question of a just and proper public policy must also be considered. In all legislation of this kind it is well to advance cautiously, testing each step by the actual results; the step proposed can surely be safely taken, for the decisions of the commission would not bind the parties in legal fashion, and yet would give a chance for public opinion to exert its full force for the right.

Withdrawal of Coal Lands.

Withdrawal of Coal Lands. It is not wise that the nation should alienate its remaining coal lands. I have temporarily withdrawn from settlement all the lands which the geological survey has indicated as containing, or in all probability containing, coal. The constitution however an he properly setsurvey has indicated as containing, or in all probability containing, coal. The question, however, can be properly settled only by legislation, which in my judgment should provide for the withdrawal of these lands from sale or from entry, save in certain especial circumstances. The ownership would then remain in the United States, which should not, however, attempt to work them, but permit them to be worked by private individuals under a royalty system, the government keeping such control as to permit it to see that no excessive price was charged consumers, it would of course be as necessary to supervise the rates charged by the common carriers to transport the product as the rates charged by those who mine it; and the supervision must extend to the conduct of the common carriers, so that they shall in no way favor one competitor at the expense of another. The withdrawal of these coal lands would constitute a policy analagous to that which has been followed in withdrawing the forest lands from ordinary settlement. The coal, like the forests, should be treated as the property of the public and its disposal should be under conditions which would inure to the benefit of the public as a whole.

CONTROL OF CORPORATIONS.

CONTROL OF CORPORATIONS.

Recommends Some Minor Changes to Laws Recently Enacted.

Laws Recently Enacted.

The present congress has taken long strides in the direction of securing proper superivision and control by the national government over corporations engaged in interstate business—and the enormous majority of corporations of any size are engaged in interstate business. The passage of the railway rate bill and only to a less degree the passage of the pure food bill, and the provision for increasing and rendering more effective national control over the beefpacking industry, mark an important advance in the proper direction. In the short session it will perhaps be difficult to do much further along this line; and it may be best to wait until the laws have been in operation for a number of months before endeavoring to increase their scope, because only operation will show with exactness their merits and their shortcomings and thus give opportunity to define what further remediate legislation is needed. Yet in my judgment it will in the end be advisable inspection law to provide for putting of date on the label and for charging the cest of inspection te the packers.

## The Discontented Lion

An Animal Story Por

An old lion named Leo, who had lived in a circus tent for many years, grew very tired of the life he led and said:

"Here I am caged up, with only half enough to eat, and all these strange people staring at me, and the men who run this show make all of the money and have a good time too. I'm tired of it and intend to escape at the very first opportunity, find a partner and go into business for myself."

So one morning when the animal keeper opened the barred door to feed the lion old Leo gave one spring,

took possession of a dance at the the country, tired, thirsty and hungry. in shooting distance of the Rye Straw any of the other animals saw him look for partners, but as soon as grave yard. The constable was shot they would run away in terror, never giving Leo the opportunity to tell of his wonderful plans.

After wandering about for several days without being able to find anything to eat he determined to go back to the circus, but when he reached the playing, and will play the remainder town the circus had left, and, as every one was afraid of Leo, some men formed a company, armed themselves and shot him on sight.

## FADS AND FANCIES.

The ever popular separate waist for pattern No. 1490 is cut in sizes 32, 34, the coming season shows a great many 36, 38, 40, 42 and 44 inches bust measure plaid designs, in both silk and soft wool Price 15 cents. fabrics, which are now on the ascending wave of fashion for all but the most important and dressy occasions.

These waists are made absolutely plain, or with broad tucks or other tail ored effects, each side of plait at centre ront, and are usually worn with a still collar and a trim little bow tie of dark ilk. Many of the imported linen shirtwaists are in strictly tailor made effect and embroidered.

Simple models for every-day wear in nearly all cases are made with the fu length sleeve, not over full, and finished with a neat little cuff of its own material. The more dressy the waist the horter the sleeves. The most elaborate models show almost no sleeve at alljust a closely shirred puff of some six or seven inches at shoulder over undersleeves of lace, much befrilled at elbow and rather plain below. Many waists show a combination of plaid and plain fabric; this idea also appears in many of the new tailored frocks, which, when made of plain materials such as broadcloth or Panama, have insets of bias plaid strips set lengthwise in both waist and skirt. Some of these tailored suits are in three pieces, coat, waist and skirt; in these the coat is usually of one material, even when skirt and waist are \$7.50 to \$25 trimmed or combined with the plaid.

Braids and the old-fashioned "sawtooth trimming, made of heavy satin ribbon are being much used for garnitures on both jackets and skirts. The new skirts show a return to the graceful plaited styles that are so much more becoming than the circular effects lately in

Ladies' Fancy Waist in light yellow taffetas plaited into a square yoke of cream colored Irish lace. The yoke extends across the front only, and is finished with a narrow lace band or sill edging. The collar and cuffs are of the same lace and finished with edging to match. The back has three tucks on each shoulder, stitched down for about five inches. The pattern 2101 is cut in sizes 32, 34, 36 and 38 inches bust measure. Price 15 cents.

#### Healthy and Happy on Twelve Cents a Day.

Augustus Riley, a clerk in the War Department, seventy-four years old, de lares that he spends less than twelve ents a day for his living.

"My average expense every day for we years past has been less than twelve ents," said Mr. Riley, "and I have had plenty to eat. The system requires only o much. I sleep like a baby, and at leisure I go for a several miles' stroll through the parks.

"I never get hungry; most people feel that way when their imagination runs away with them. I live on \$4.11 a month and I have an itemized statement to prove it. My favorite dishes are apples, eggs and rice. I avoid meats and indigestible foods. They tear the vital place in the signal service.

organs up and put them out of use." Riley saves 95 per cent of his salary. He is a man of strong personality and is an excellent specimen of manhood. He is not a miser, and declares he abhors the life of a recluse. He says he tiny vertical and parallel chains. These lives well, and he is the envy of the chains are charged with a current of clerks who squander all their earnings electricity, sufficiently strong to kill inand are heavily in debt. He never takes

a drink and abhors coffee. I have never used tobacco in any form," he said. "It is dead easy to live a life insects to their death. of economy and thrift, and there is no pleasure in spending all one's earnings in extravagant living. As a matter of fact. poverty forced a quiet life upon me. After being swindled out of severa! thousand dollars in my early life I decided to retrieve my losses and to save small."

sults at times. It did me good and

"How do I live on so little? Why, that's simple. My restricted diet, now that I have a good salary, is simply a matter of choice. It is the healthiest and happiest way to live."

#### Facts From Many Lands.

A substitute for wireless telegraphy imited, however, in its application, has ocen invented by an officer of the artilery branch of the United States army. Simple signals can be given by means of an enormous shutter, with slats a foot wide. These slats are painted various colors and are operated by a lever. The present high cost of the wireless system may give the shutter an important

Maurice Chaulin, a French inventor has perfected a clever apparatus for killing mosquitoes. It consists of a small lamp-electric or oil-hung between two rings, the rings being connected with stantly a mosquito which touches any two of them at the same time. The light "I never took a drink in my life, and in the lamp, which is entirely surrounded b ythese chains, attracts these

> "Dearest," he said, as they were at breakfast, "there is but one fault I can and with your doughnuts.'

> "What is it, George?" "You make the holes entirely too

A CENTURY OF ROMANOFFS

be assassin, a prisoner, and, approach ing him quietly, ordered his removal. At that moment came the second ex plosion, which shook the whole city, and minute or two later, when the Grand Duke Michael bent over the mangled body of his brother and asked him it he wished to be removed to a nearby house, he caught these faint words:

Continued from first page.

"Quick, home-carry to palace-there CZARS AS HOME LOVERS AND HOME

MAKERS. In these last words of a great emperor stands revealed the latter day Romanoffs' love of home and family Historians unite in declaring that both Alexander II and his son and successor, the third Alexander, in their home life were above reproach; and though Nicholas II is being damned for many things these days, even his bitterest enemics credit him with being a good husband and father, and an intense lover of his

The apple of Alexander III's eyes was his son George. It was pathetic to see the father, a giant in stature, with the strength of an ox, with hands that could crumple a plate of silver, tagging around after and doing the bidding of this delicate boy.

One day the two went out hunting The lad shot a duck, which fell into what looked to be a shallow stretch of water. The boy plunged in after the game, only to find himself swiftly sinking in a treacherous bog. His cries brought his father, whose great strength enabled him to extricate his son, even after the latter had been swallowed by the bog up to his neck.

Both returned to the palace wet through and chilled, and the boy in high fever. In the middle of the night the father wished to go to the boy's room to see how he was. The Czarina, thinking of her husband, objected, saying that the trip through the long, windy corridors to the other end of the palace would be dangerous, especially as he was still chilled from his experience of the afternoon. The Czar had never been able to stand up against the pleadings of his wife; he lay back in bed, feigned sleep, and she, thinking that she had accomplished her object, returned to her room.

A little later the Czar, clad only in a bathrobe and slippers, was quietly slipping to his boy's room. There he. remained for some time watching beside the sleeping child before returning to

A day or two later the chill had settled in the Czar's vital organs; how it came to do so was brought out by the doctor's questioning. And a few weeks after that the Czar was lying cold in death.

"THANK GOD FOR WORONZOFF!"

Another story of this same Czar's parental tenderness has been told 'round

When Alexander traveled by rail his rain was always divided in four sections, that the Nihilists would not be able to locate the section in which he was secreted and thus blow it up. But, despite this precaution, the bomb throwers did ascertain once on which section for separate skirt or as part of a cos- the Czar would travel, and it was ried a printed paper. tume. It has the stylish front panel ef- promptly blown to bits.

fect and closes with an inverted plait at The Czar succeeded in extricating the Czarina, his daughter and himself from sizes 221/2, 24, 25, 261/2 and 28 inches the wreckage, strewn with dead and dying guards. A little group, they stood, number plainly, and enclose fifteen cents | unguarded and in the midst of carnage, for each pattern desired. Address all on the barren steppe. Suddenly the nerves of the child gave way; she flung herself into her father's arms and sobbed out:

> "Oh, papa, now they'll come and murder us all!"

And the Czar, oblivious to the probable truth of his child's heart cry, comforted her, and was discovered so en-

gaged when protection arrived. Alexander III was not without a sense of humor; its possession is a saving

grace to a Czar even. It was while he was Czarevitch that he assumed command of the famous Preobrajenski regiment, a portion of which recently revolted against the Czar. Shortly after he had taken command it became necessary for the names of the officers to be read to him. German name after German name was reeled off. Clear down to the letter

Then "Woronzoff!" was sung out. "Thank God for Woronzoff!" ex claimed the Czarevitch, with a dry smile and a sigh of relief.

"W" not a Russian name was read

During his fatal illness the Czarina the present dowager Czarina, was in constant attendance at her husband's bedside. They held hands like two lovers by the hour. One day, turning to his physcian, the sick man, who had been told that death was only a question of weeks at best, exclaimed:

"I have even before my death got to know an angel."

His son, Nicholas II, said something worthy to be coupled with that at the best I had. "I-I rather keep an eye I read aloud the last entry:

time his first child was born.

With tears in her eyes the Czarina asked the forgiveness of her husband because it was not a boy.

"I am extremely pleased to have a little girl," he said, as he comforted her This child is ours, and ours alone. If a son had been born it would not have been so. He would have belonged to It is not of record that he reiterated

this sentiment as daughter followed daughter, even to the number of four However, in this case, like father, like on. No matter how late he reache home, Alexander III would seek out his sleeping babies, kiss them, and cross himself over them. No matter how troublons the times, Nicholas II is reported to romp daily in care-free fashion with his five children.

"What is Nicholas II?" asked Clemenceau, now grown to be the greatest one-man power in all France, when the young man ascended the throne of his fathers. And he answered his own query in these words: "Nobody knows, possibly not even himself."

Twelve years have come and gone since that day. In this time the Czar, either wittingly or unwittingly, has done and caused to be done many things that should give a good idea as seemed to me that the time was of no that. I bowed formally to the manner of man that he is. But importance just then. They spoke in Wrangle's detaining hand M to-day, as yester year, the question is heard on every hand, "What is Nicholass II?" By the token of numerous widely antipodal answers it is plain that, excepting the Nicholas of the home. "nobody knows." And shall we add. "possibly not himself"?

But, for that matter, what was the other Nicholas? What the first Alexander-the second-the third?

When the people of St. Petersburg shouted for "Constantine and a Constitution" -- Constantine was Nicholas' weak-minded elder brother-and naively asked if Constitution was Constantine's wife, Nicholas mowed them down with cannon and fed them to the Neva gave his last breath to a plea for the freedom of the serfs. His son freed I insist that before going further I be them; he also turned Poland over to the mercies of Mouravieff, surnamed "the hangman." In the treatment of his family no man could have shown a tenderer. bigger heart than Alexander III. He it was who persecuted Nonconformists, Wrangle—this Mr. Harold Martin, son slender youth and his mother we whole world rang with the horror of it all. The first Alexander was one of the three parties to the Holy Alliance, formed to stamp out the spread of republican ideas. Yet when he came to die he said: "They may say of me what they will, but I have lived and died a

republican." What is the modern Czar? crowned Dr. Jekyll and Mr. Hyde? It is a question the right answer to which baffles the conscientious historian.

## A MATTER OF MIND

By JAMES EDMUND DUNNING. (Copyright.)

The policeman I had been noticing for some minutes came across the station to where I awaited my train. He car-

"Where are you going, sir?" he asked me, looking to the paper and back again. I had just bought a Providence ticket, but I replied: "Excuse me, but I'm not sufficiently

decided to inform you.' He did not seem so indignant as I expected, but smiled with an indulgent kindliness which angered me.

"No offence, sir," he continued, "only -well, aren't you Mr. Martin-Gerald Martin, of Philadelphia?"

"I'm not obliged to reply to such impertinence," I said.

'No; but aren't you?" "What?"

"Mr. Martin, of Philadelphia?" "No!" I replied, in a way intended to settle our growing difficulty.

"I see," remarked the fellow, with amazing effrontery, because I could not understand what he could see; "then, sir, as a special favor to an officer in the discharge of his duty, will you tell me who you are?"

"A duty?" I asked incredulously. "An important one, sir," he replied, so earnestly as to win me. I picked up my bag to enter the Provi-

dence train. "Since you insist," I said, "I'll tell you my name is-my name-is -why--officer-Horrible, indeed! I could not recall

The more I tried the less I could. It was a most astounding psychological incident. I was interested, but annoyed. The policeman enjoyed another indulgent smile and made a sign which brought up two men; they must have been watching us. I did not find myself able to respond with sincerity to their this library three successive weeks and greetings. One, a tall youngster, ad- live. dressed me most familiarly. The other

on the market, and I write sometimes." hat was as easy as anything. The end of it was that we all went

call on the chief of police. I felt hagrined. They chattered at a fearful rate, and then one said: "He has been calling himself George Marsh," My heart leaped.

"I am George Marsh, gentlemen," I cried, for it seemed to come back to me then, "and I am a lawyer by profession, hough given to literature. I live in the ity of Boston, at the Winterset hotel."

looked at me hard said: "And how long have you lived in Bos-

ton, Mr. Marsh? "Oh," I answered, "not-not so long, you know-not so long." Really, it been cavesdropping, and I low tones, until my quiet acquaintance a most attractive person. I m

"Mr. Marsh, we are in a very difficult with her arms about me. situation. We cannot get out of it without your aid. I beg you will not insist my love help you to see it all a on our at present informing you of the I leape details. I want to ask you if, as a very man off, special favor, to help persons in deep insult. distress, you are willing to join our party and accompany us to Philadelphia, a joke, well sir," and I started free of expense, and at a reasonable compensation for loss of time."

"How long?" I asked, wondering what was coming next.

"Two or three days-perhaps," he re-

do you a service-because you seem to be agitated to an extraordinary degree. We started for Philadelphia with no delay, and I found myself in company whose agrecable manners were temthrough holes cut in the ice. Yet he pered with a respectful reticence. On nearing our carriage at Camden station halted and said:

"Gentlemen, you must excuse me if I insist that before going further I be admitted to a knowledge of our errand." The slender youth seemed fit for re-

monstrance; but the other, whom I had fall on the floor, begun to like, interrupted:

of Mr. Gerald Martin-" "My double, I suppose?" I said. "Yes," replied the doctor, and I won-

dered what about his face reminded me "As to our errand," he continued, "Mr. Martin most mysteriously disappeared three weeks ago. We are searching for him, and we want you-a practical lawyer with plenty of leisure, to take up the hunt as an entirely unprejudiced per son. The best detectives have failed.

We have been seeking a man exactlyyes, I may say exactly like you."

"You display astounding confidence in a stranger," I suggested. "We are desperate," replied he. "Mr Martin is frantic with grief and appre hension. Will you allow us to put you in entire charge of the search for a su ficient period to make a study of the

case? I got into the carriage.

At the door young Martin led the way past a pretty maid into a house set with obvious elegance. It occurred to me that the missing Martin lived well when he cry. was at home. The doctor and I waited. Harold ran upstairs. I heard a door unlatch, and a woman's voice cried some thing indefinite. Then Harold broke in: "Yes, mother," he said; "we've found

The door closed. I found the doctor egarding me intently "Well, sir," he remarked, as if expect

ig me to say something of importance "Mrs. Martin was expecting me then?" I inquired. "Expecting you?"

"Yes—or some one in my capacity."
"Yes." The doctor led the way to ward what looked like a library. needed you desperately."

"It's very flattering to be in such de nand," I replied. "You'll be better than Jolworthy, the

olice detective who has been bungling he case," returned the doctor. "He has been outrageously careless of Mrs. Marin's feelings. This is Mr. Martin's

"Martin lived well, anyway," I said 'A bookman, wasn't he? No. a lawyer." A good one, then."

"Yes; good to all but himself."
"How?" "Overwork. His last murder trial finshed him.

I surveyed the room in detail. It overflowed with elegance. "I've discovered a clew, doctor," cried, as I stood before a ripping col

lection of Byzantine teapots. He was by my side instantly, all alive. "Don't start," said I. "I've only discovered that Martin was out of his No sane man could stay out of

Synopsis of Preceding Chapters

Olive Dumbarton, after the legal separation from her brutal husband, becomes a successful authoress and lives quietly with her daughter, Veronica, in flexton Road, St. John's Wood, London. Her husband secretly returns to London and by letter makes further demands for money. Her cousin Valerius Galbraith, a man of independent wealth who has been in love with her since early youth, calls to say farewell before starting on a trip to Egypt. A fortaight later Olive Dumbarton is found in her library holding a danger over the dead body of her husband, sinc is arrested and held for trial, and detectives are put on the case. George Bostock, the publisher, and Valerius Galbraith take an active interest in the investigations, and the former is shadowed by inspector Mackworth. Angela Mezza, an Italian woman, swears to Mrs. Pumbarton and Inspector Mackworth that the murder was committed by her husband. The Inspector discovers Pietro, a model and former companion of Mezza. Synopsis of Preceding Chapters

they can and will stop disease, cure it and lift you up again to health and London till I told him last night." "No. Pietro did not know he was in

"They were good friends." Lorenzo said nothing, but contented "I can find it for you. I should think himself by nodding his head by way of he had been sinking for some time. At assent; and Mackworth, thinking there all events, he had greatly neglected himtreatment of these was no further information to be ob- self and was in a very bad condition." tained from him, hastened away in search of the Summers street lodging house.

On reaching Maria Roselli's house, the number of which had been given him by Lorenzo, the inspector knocked oudly, and then impatiently waited for n answer. None came, nor did any sound of voice or movements within the dwelling indicate that was tenanted. He rapped again with like result and then stepped into the street to view the dwelling. As he did so, the high, narrow door from which the paint had long since faded, opened, and a woman's figure stood framed in the portal.

Mackworth, eagerly observing her, saw she was tall and thin, her years about sixty, her regular features wearing a hard expression, the dark eyes wrinkled, something masculine in bear-

'Are you Maria Roselli?" he asked, dvancing toward her.

'Yes," she replied, returning the gaze "Then I want to speak to you." "You can talk here," she said in ex-

cellent English. "It is something I don't wish to say in the street." She hesitated a moment, then drew

aside to let him pass into the hall, closed the door, and ushered him into a barely furnished, uncarpeted room. "Is Marco Mezza in the house?" Mackworth began.

"Marco Mezza?" she repeated, without surprise being noticeable in her voice or face. "No." "Then where is he?"

"I don't know," she replied, frigidly.
"But he has been here?" "Oh, yes."

"Some time in September. I don't renember the date."

"I want you to tell me all you know about him.' "Why?" she asked, staring hard at Mackworth.

"I am a police officer. He may be oncerned in a very serious business; will see why I ask for him. Mackworth saw she expressed neither stonishment, interest nor anxiety. His

words left her perfectly indifferent to heir inference "I know very little of this Mezza. He came here some weeks ago, as I have

"He was a friend of yours?" "I had never seen him before. A Neasolitan living in Paris gave him my adfress," she answered. "How long did he stay with you?"

"Three days. I would keep him no "Why?" asked the inspector, anx-

iously. "Well, he was nearly always drunk, and then he was ill; his coughing kept my other lodgers awake at night. My

ouse was no place for him. "And so you got rid of him?" "I told him he should go to the hos

And he went? "He left here for the hospital, but lon't know if he ever went there," she answered, the same calm indifference ticeable in her manner.

What hospital?" The Italian; he spoke little English.' And afterwards-did he return to

No; he knew I would not take him. "Have you made no inquiries for

'No; why should I?" Maria Roselli asked, in her hard voice. "I have to fore. nind my business if I would live, and have had trouble enough in my own quire for them?" life without going in search of it among strangers.

"Had he any friends to see him while he was here?

"Not one. He slept all day, because he was awake coughing all night. When he went out in the evening it was to buried in Kensal Green.

the public house." "Which public house?"

"That I don't know." "And he returned alone?"

"Always." After this the woman moved toward the door, as if to indicate the interview must end. She had neither the curiosity nor sympathy to inquire what it was Mezza had done to put the police on his track.

Mackworth, seeing she could give no more information, became impatient to reach the Italian hospital, which he knew was situated in Queen's Square. There no doubt, he would be able to learn above and a drenched and sombre where Mezza had gone on being discharged, and perhaps to trace directly him the mad deed which, no doubt is illness and want of opportunity had prevented him from committing during he first days of his return to Eng-

Passing through the wide hall of the hospital, which had been the dwelling of people of fashion when Queen Anno reigned, Mackworth was shown into a reception room, and soon the door pened, and the superioress entered and

"Bueno giorno, signor," she said, pleasant voice.

vanced stage of pneumonia.' "Do you remember the date?"

"How long did he remain here?" "He lived for about twelve days."
"Lived!" the inspector repeated.
"Then he is dead?" 'Yes, he is dead."

"But, tell me, did he leave the hos pital for a day-for an hour-from the time he came in until he died?"

"No; that would have been impossible, The doctor knew from the moment he aw him that Mezza was a dying man.' Mackworth's astonishment and disppointment were great. If Mezza was in the hospital on September 21, then it was not he who had murdered David Dumbarton.

"What was the date of his death?" "I will bring you the book in which all particulars of our patients are enthe superioress said, and she quickly left the room.

"Can it be possible Mezza is innocent?" the inspector asked himself, unold and speculative, the face lined and willing to root out the idea which had taken possession of his mind.

In a couple of moments the superioress returned, carrying a heavy book, which she placed upon the table.

"Ah, here it is: Marco Mezza, admitted the 8th of September; suffering from pneumonia, accelerated by drink place of birth, Naples; age, 40; profession, violinist; address Rue Petit Maetre, Paris; date of death, 21st of September, hour, 6 p. m.

not a friend, but a man in whom I am rible might issue from its walls and bar his way to the presence of the wonan he loved.

As he quickened his pace he almost overtook the servant as she opened the drawing-room door; then he stood quite still and almost breathless, gazing before him. The apartment, which was faintly lighted by a single lamp, showed him the figure of the woman he sought, seated at a table on which she had thrust out her arms, between which her head was buried. There was something so pitiful and despairing in the abandonment of her attitude that all the misery he had felt that day became suddenly accentuated, and he recognized that here lay the cause.

With intuitive delicacy he stepped back, until, the servant's entry having listurbed her mistress, the latter rose, and, turning her back to the light, prepared to receive him. Dimly seen as it was, her pallid face, drawn and haggard, with its eyes dull and swollen, its mouth quivering, and, above all, its expression of utter misery, startled him. The hand he held in his trembled and

felt cold as death. "What has happened?" he asked. while dreading to hear her reply.
"You have not heard?" she said, in

low, broken voice. "I have heard nothing new. Tell me what it is."

"All hope of saving me is lost."
"No, no, not that!" he cried out, fiercely, as if in defiance of the statement.

"All. That man-the Italian-"Has escaped?" "Has been traced to his grave."

"Well?" "He died in a hospital a few hours before my husband was killed," she said, triving to steady her voice.

In a second he realized what the consequences of this discovery might prove to the woman before him. "When did you hear the news?" he

asked, presently.

Date of death, 21st of September."

Marco Mezza had died but a few hours before the man whose life he had threatened to take had been killed. "Did he not send for his wife or his

friends?" Mackworth asked. "He told us on entering he had no wife or no friends in London; that he had come from Paris four days be-

"But toward the end he did not in-"He did not know he was dying, and during his last three days he was de-

lirious. We sent the certificate of his death to the Italian Consul, who will forward a copy to Mezza's relatives in Naples, if they can be found. He is

There seemed nothing further to be known regarding this unhappy man; here was the end for him, so far as this world went. Mackworth thanked the superioress for the trouble she had taken, and left the hospital in a different mood from that he felt on entering, all his plans upset, his spirits de-

The man who had killed David Dumbarton was still to be discovered.

CHAPTER XVI.

On a cold and cheerless afternoon in October, with a gray and lowering sky world around, George Bostock took his

way to see Olive Dumbarton. Walking along the broad, soft-carpeted corridor leading to the drawingoom, he glanced toward the entrance of the study where the terrible tragedy had taken place; the study with its floor still smeared and stained with blood, its windows closed and shuttered, its furniture dust-covered, its door locked. Never had he passed it since that night which ended David Dumbarton's life without feeling a sickness of heart and physical repulsion, but now his aversion and dread were heightened, and he hurried by as if he feared something hor-

"This morning; the inspector came tell me.

"And you have been alone ever since your trouble?" he said, looking at her. "I sent for my cousin, but I suppose he was not in his rooms when my message reached him," she replied. But tell me about Mackworth; has ne no nother clew?"

"Not that I know of, at least," sh answered wearily. "He may have, though he withholds he remarked. from you,

"Why do you think he would keep back from me?' "He might not wish to speak until

he was able to prove his case.' "I see," she answered, a grateful look in her eyes, "you are striving to give me hope, but I cannot blind myself to the fact that circumstances seem dead

against me.' Though her voice was calm, there was an undertone of pitifulness in it that appealed to her hearer more directly, more keenly, than she could have be-

"No matter; it's my belief, one of two things must happen," he said, his manner growing more serious, if pos-"And that?" she said, eagerly.

"Either the man who killed your hus band will be found-"

"Or he will confess."

She shook her head sadly, saying: "I fear the murderer will never be discovered; you see, all these weeks go by and no definite clew has been obtained; as for confession, that I dare not hope for." "Why not?" he asked.

"I cannot imagine a man who would be guilty of murder sacrificing himself to save the innocent. "But I can conceive circumstances,

Mrs. Winslow's Soothing Syrup for Chil-

replied Bostock, speaking slowly and with emphasis, "under which a confes-"What are they?" she asked.

"A man may commit murder through feeling of hatred or revenge, and yet shrink from indicting a terrible blow on one who had never wronged him," he

'You think so?" "Is it not a reasonable surmise? He may through moral cowardice, and in the hope that you may be acquitted of this charge without the necessity of his intervention, wait until the last moment, and then, if there are no other means of freeing you, he may speak." She shook her head, saying:

"I cannot agree with you; a man who commits murder is not one to make such a sacrifice.

After a pause she continued, "It is so easy to imagine what we might do were we situated as others are, or were and yet so difficult for us really to put ourselves in their places. The man who took one life to gratify his hatred or revenge, would not. I think, hesitate to see another life sacrificed to save himself from the consequences of his ac-

"There may be exceptions," he an swered from out of the darkness. "There are exceptional men in the world; but I dare say they are very

few," she replied. "And I can almost realize," said George Bostock, with a force in his words that startled her, "how welcome expiation would be to a burdened concience, and how necessary a confession ight become as an escape from the inliction of an intolerable secret."

"Such things can only be known to and judged of by the guilty," she mur-

"You mustn't give up all hope yet," said earnestly, longing to relieve her lepression. But my prospects look black." "You forget the old saying, that the darkest hour is nearest to dawn."

"And you really think that my inno-"I am sure it will," he answered. firmly.

"Sure?" she repeated, surprised alike by the words and by the tone of the expression. "How-why-?"

"Because-" he began, and then "Yes?" she said anxiously, her feelings wrought to intensity.

"Because, as I have said, murder wil out one way or another." Her eyes expressed the disappoint ment she felt at hearing him express this vague generality instead of some particular explanation.

"Is that all?" she asked, in a low, dispirited tone.

Before he could reply the bell of the "It is Valerius," Olive Dumbarton re

She did not ask him to stay, but said You will come and see me again soon, "Very soon," he replied gravely, as

coldly regarded the publisher. bowed as they passed without speaking. "She loves him," George Bostock Bostock thought, as he emerged into the rain and darkness, and the depression he had felt all day grew deeper yet.
(To be continued.)

Largest Private Estate

By the recent acquistion of a tract of 170,000 acres Santa Gertrudes Ranch, in southwest Texas, already reputed to be the largest estate in the world owned by a private individual, was increased to the immense proportions of 2,000 square miles, or 1,280,000 acres. This single ranch is, therefore, almost twice as large as the State of Rhode Island and contains 25,000 more acres of land than does the State of Delaware.

All this immense area, says Harper's Weekly, is owned by one elderly woman of simple tastes and retiring habits, who takes no active part in its management and does not even live upon the land for the greater part of the year. Her interest in the ranch is strongest during Christmas week, when, with traditional Southern hospitality, she entertains half a hundred guests in the great manor

However impressive the statistics of Santa Gertrudes may be on paper, the visible reality is not at all imposing. On a slight swell of ground, by no means high enough to be dignified by the name of a hill, stands the ranch house, a neat white building large enough to serve the purpose of a good-sized hotel, with detached dining-room and kitchen and abundant verandas, after the Southern

To the rear is a grass-bordered reservoir fed by an artesian well, an untidy barn and corral, and blacksmith shop and some shade trees. At the right is the ranch commissary, whence are drawn all the necessaries of life and as much of its luxuries as the scanty Mexican population of the ranch ever know Beyond the commissary lies a hamlet of neat brick cottages, which house the Mexicans wire are employed at headquarters.

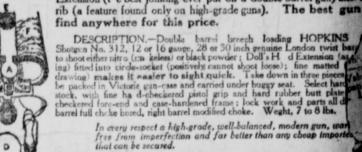

From the upper windows of the rand house one may look out in any direction over an expanse of level prairie fringed with mesquite, until the hazy rim of the horizon shuts out the view; and that is absolutely all. However thoroughly convinced one may be of the existence of those 2,000 square miles, or of the 80,ooo head of cattle and 2,000 head of horses and 2,000 goats that graze thereon, as a spectacle the largest private estate in the world is a distinct failure.

It does not take many men to run a big ranch. The total population of Santa Gertrudes, white and Mexican, men, women and children, is three hundred. If the ranch were as densely populated as Rhode Island it would have 814,000 inhabitants. Even the three hundred are scattered so that very few of them are ever seen together.

The ranch is divided into seventy pastures. On each of the largest and on groups of two or three of the smaller pastures a family lives. A small pasure, in this instance, is understood to

THE HOPKINS & ALLEN ARMS CO., . 131 Franklin Street, Norwick,

In the horse department a foreman nd forty men have charge of a herd of six hundred Percheron and thoroughred brood mares, but as the breeding farm occupies six hundred acres, there s no crowding.

There are never any murders or slugings, nor even a strike to add to the est of excitement to the life of the anch. All the employees here, as elsewhere in southwest Texas, are Mexians, who are actually content to be faithful, industrious, honest, trustworthy ervants as long as they are decently treated.

At a salary of ten dollars a month and rent and provisions they render faithful and cheerfully willing service under all circumstances, and train their children to take up their tasks where they lay them down. The old cook at the ranch house has held his post for ifty years. There is no labor problem southwest Texas.

The only time when there is keen acivity around the ranch is during the great spring roundup, when the calves are branded. There were 24,000 calves to brand last spring.

It took the corporal and his thirty aqueros a solid month of severe toil to do the trick. Cowboys, by the way, never see anything but hard work. Their hours are from 4 a. m. to 8 p. m., or as much longer as circumstances may require, every day in the year. Santa Gertrudes ranch was founded in

853 by Captain Richard King, a former lississippi river pilot, who, with his friend Captain Mifflin Kennedy, had charge of the transport service on the Rio Grande which supplied General Tay-lor's army during the Mexican war. Captain King's ambition was to possess "I must go now," Bostock said as he the largest and best conducted ranch in Texas, but he died twenty years ago, after accumulating 300,000 acres. ne property was left to his widow

Mrs. H. M. King, who turned the entire agement over to her son-in-law, R leberg, a law er, who was born and leought up within one sundred and fifty miles of the ranch. Under Mr. Klehis way out he met Valerius, who, will berg's management the acreage has been increased more than so per

When Mr. Kleberg took charge of the anch it was stocked with the usual inferior long horned native cattle. He atempted to improve the breed, but the ostly blooded bulls he brought to the ranch invariably died a few days after their arrival.

Investigation led to the conviction that the fatal malady was caused by the bite of a tick, with which all cattle were in fested, but to which the native cattle used, having the last layer were immune. He invited the co-opera- a cupful of boiling water, ch ion of the Agricultural Department in and cook slowly on a mo seeking a preventive. In due time a twenty minutes. Rub process of inoculation which was found tablespoonfuls of flour to be almost infallible was perfected at spoonful of butter. Ad Santa Gertrudes.

The discovery put an end to the loss of untold millions, for Texas cattle had theretofore left a trail of infection and death among their kind wherever they went in the North. Incidentally, Mr. Kleberg was enabled to breed up his cattle until all those on the ranch are now from one-half to fifteen-sixteenths Hereford or Durham.

The practical value of the discovery was illustrated last spring, when a lot of 10,000 yearling steers was sold at \$15 a ead, and another lot of seven hundred bull calves was sold at \$40 a head. Long horn yearlings were worth \$8.
